

# NICK RADFORD

Senior Full Stack Engineer

San Francisco, California | [linkedin.com/in/nickradford](https://linkedin.com/in/nickradford) | [nickradford.dev](http://nickradford.dev) | nick@nickradford.dev | 513.290.9256

Dynamic Full Stack Engineer with JavaScript expertise, proven experience building scalable applications and leading engineering initiatives. Passionate about joining innovative teams on meaningful projects using cutting-edge technologies.

## WORK EXPERIENCE

### HEYDAY

Senior Frontend Engineer | Jan 2023 - Jun 2024

- Spearheaded the adoption of Tailwind CSS, enhancing the codebase's maintainability and design consistency.
- Led the migration from create-react-app to Next.js, improving application performance and developer experience.
- Championed the integration of TypeScript, increasing code reliability and reducing bugs.
- Developed an AI-assisted writing tool using the tiptap editor, improving content creation efficiency.
- Collaborated cross-functionally with product teams and external design firms to deliver new features.
- Built a SwiftUI-based app for synchronizing Apple Notes data into our data lake.

### GOVALO

Senior Full Stack Engineer | Nov 2021 - Aug 2022

- One of the first engineering hires; mentored team members and established coding conventions.
- Implemented an asynchronous jobs system for core features, enhancing order processing and event management.
- Developed a webhook system for seamless third-party application integration.
- Created an internal management application for troubleshooting and managing promo codes and billing plans.

### CRUISE AUTOMATION

Senior Full Stack Engineer | Oct 2018 - May 2019

- Built internal CI and data visualization tools (Next.js, Golang, Highcharts) to analyze autonomous vehicle simulations.
- Developed a side project for data scientists to manipulate and visualize data from Google BigQuery using Python and Highcharts in an Electron.js app.

### UNITY TECHNOLOGIES

Full Stack Engineer | Oct 2017 - May 2018

- Contributed to the Unity Ads platform using React, Redux, Golang, and Node.js, providing monetization insights for game developers.

### IDEAN, INC.

Senior UI Developer (Contract) | Oct 2016 - Mar 2017

- Developed a B2B web application for a multinational media streaming service using React and Redux.
- Established best practices for the development team during the contract period.

## **EUCLID ANALYTICS**

Software Engineer | Feb 2016 - Sep 2016

- Transitioned the main product from Rails Asset Pipeline to ES2015 and Webpack.
- Developed a data verification application using Express.js and React.

## **WALMART LABS (SAM'S CLUB)**

Senior Mobile Web Engineer | Apr 2015 - Oct 2015

- Led the implementation of new UI designs using Angular and CSS components, unifying styles across teams.

## **DELL**

Software Development Staff Engineer | Apr 2011 - Mar 2015

- Led a team in creating a shared UI library, aiding development across 100+ Dell products.
- Provided guidance on AngularJS adoption and best practices to remote teams.

## **EDUCATION**

### **BOWLING GREEN STATE UNIVERSITY**

Bachelors of Science in Computer Science (Incomplete) | 2007 - 2011

- Relevant coursework: Software Engineering, Data Structures, Web Development

## **SKILLS**

Languages	Tools	Frameworks & Utilities	Other
TypeScript / Javascript	Git	React	Agile Methodologies
HTML	Heroku	Next.js	Cross-Functional
CSS / SCSS	Vercel	Tailwindcss	Collaboration
Golang	GraphQL	Storybook	Mentorship
	Figma
